

DIANA ALVAREZ SANCHEZ

Hidalgo, TX

📞 956-742-9111 ✉️ dianaa.alvarez03s@gmail.com [🌐 linkedin.com/in/diana-alvarez-san](https://www.linkedin.com/in/diana-alvarez-san) [🐙 github.com/dalva304](https://github.com/dalva304)

Computer Science graduate transitioning into Product Management, pairing hands-on AI/ML and full-stack technical experience with product strategy training.

EDUCATION

University of Texas Rio Grande Valley

Aug 2022 – Dec 2025

Bachelor of Science in Computer Science

Edinburg, TX

- **Relevant Coursework:** Data Structures, Algorithms, Computer Networks, Digital Systems, Cloud Computing, Cybersecurity, Deep Learning in Medical Imaging, Database Management, Web App Development

CERTIFICATIONS

- **IBM Product Management Professional Certificate** — Coursera (*In Progress, Expected November 2026*)
- **AI Fluency** — Anthropic
- **Claude 101** — Anthropic

PROJECTS

Language Learning App | React, Django, Gemini AI, Figma, Claude, Cursor

Sep 2025 - Dec 2025

- Defined feature priorities and gathered feedback from outside testers to guide iteration on an AI-driven translation web app, coordinating a 4-person team through Agile ceremonies.
- Contributed front-end development using React and AI-assisted tools (Cursor, Claude), while integrating Gemini AI to prioritize culturally relevant translations over literal ones.

Amazon App Navigation Simplification | Figma

Apr 2025

- Identified visual clutter and inconsistent calls-to-action in Amazon's mobile browse and cart screens as a barrier to fast task completion, scoping a focused fix rather than a full app redesign.
- Simplified department browsing into a flat icon grid and reduced cart actions to three clear CTAs, cutting on-screen decision points versus the current app.
- Built and tested an interactive Figma prototype to validate the simplified flow.

Brain Tumor 3D Segmentation | Python, PyTorch, MONAI

Feb 2025 - May 2025

- Evaluated trade-offs between UNETR and SegResNet architectures to automate segmentation of 750 3D MRI volumes, translating model performance into clinical decision-making value.
- Achieved high accuracy with SegResNet (Dice = 0.87), streamlining diagnostic imaging and treatment-planning workflows.

Task Manager Web & Desktop App | Python, Django, SQL, JavaScript

Feb 2025 - May 2025

- Gathered requirements for two distinct user roles (individual users and admins) and designed role-based interfaces to meet each group's needs.
- Built a responsive front-end enabling admins to manage assignments and users to securely update task status.

SKILLS

Product & Collaboration: Agile/Scrum, Figma, requirements gathering, cross-functional team collaboration, GitHub project tracking

Technical Fluency: Python, SQL, React, Django, JavaScript/JSX, Cloud (GCP, Azure), AI/ML (PyTorch, Gemini API)

WORK EXPERIENCE

H-E-B Grocery

Sep 2023 – Present

Personal Shopper

Edinburg, TX

- Managed multiple simultaneous curbside pickup orders under strict deadlines while resolving customer inquiries, building skills in prioritization and customer-facing problem-solving.

LEADERSHIP / EXTRACURRICULAR

Society of Women Engineers | ColorStack | Frontera Devs

2023 – Present

Member

University of Texas Rio Grande Valley

- Engaged in technical workshops, peer mentorship, and professional networking across three student organizations advancing diversity and collaboration in engineering.
